

TAKING CARE OF YOUR DATA CENTER INFRASTRUCTURE 24/7

The Customer Service Center is committed to improving the service quality and providing a quick round the clock response. Our team responds to requests 24/7 through four communication channels: Customer Portal, Telephone, e-mail and Chat.

CUSTOMER SERVICE CENTER

As a single contact point and primary contact method, our Customer Service Center provides high quality service to manage and solve any type of request, incident or ticket around your IT platform or contractual conditions. We can solve any issue through the different channels and directly with the responsible manager.

With a multichannel and multilingual support, Itconic can resolve or coordinate any issue related to Hands & Eyes, Cross Connect Service, Work-Orders, Network & Security, Room Maintenance, Building Access, Deliveries/Removals as well as Contract and Billing issues, Scheduled Works management and Products & Services enquiries.

At Itconic we care about our clients and we look for a close relationship. It means that besides our single point of contact, clients will also have access and close communication with the specialized team responsible for each service. Additionally, a 24/7 support is available to respond hand-to-hand to any onsite work you may need. The value of that proximity and knowledge of the client enables Itconic to offer an industrialized yet customized service.

WHY ITCONIC

We get companies connected to the rest of the world with the most innovative technologies through the major interconnected Data Center Platforms in Spain and Portugal.

We work to move forward the digital IT Transformation processes in Telcos, Cloud Providers, Organizations and Public Administrations.

Itconic provides a complete connectivity ecosystem and service portfolio - much more than a simple data storage. This great ecosystem of our Data Centers, Network and Services Providers, Neutral Exchange Points and Cloud Services Providers ensure companies the best connectivity.

A professional qualified IT team expert in consultancy, designing, building and IT infrastructure management offer an excellent customers service to increase the efficiency of our customer's communications and IT platforms.

WE USE RENEWABLE ENERGY

100% of our Data Centers power come from renewable energy, contributing to reduce carbon footprint. It's estimated that 2-3% of global consumed power come from IT environments. Management and decision making in our company follows our Environmental Management System certified by ISO-14001.

CERTIFICATIONS

Itconic Data Centers are backed up by the main certifications of the market.

ABOUT ITCONIC

Itconic is a global company for IT services, expert in the management of Neutral Data Centers and Cloud Management Services, with over 20 years of experience in Spain and Portugal.

The Spanish company allows its clients to improve efficiently their processes of digital transformation thanks to a multidisciplinary team of global storage management, migration to the cloud, maintenance and connectivity to ensure continuity and safety in its IT infrastructures, 24/7.

Furthermore, Itconic has the largest platform for Neutral Data Centers in the Iberian Peninsula so that their clients, in their five centers, are interconnected with the rest of the world; with access the main telecommunication providers, Neutral Internet Traffic Exchange Points and hyperscale Cloud Providers.
